I. Invited Lectures

Ionoluminescence decay measured with single ions
F.D. McDaniel, B.L. Doyle, C.H. Seager, D.S. Walsh, G. Vizkelethy, D.K. Brice, C. Yang, P. Rossi, M. Nigam, M. El Bouanani, G.V. Ravi Prasad, J.C. Schwartz, L.T. Mitchell and J.L. Duggan 1
Insight in the outside: New applications of low-energy ion scattering
H.H. Brongersma, A. Gildenpfennig, A.W. Denier van der Gon, R.D. van de Grampel, W.P.A. Jansen, A. Knoester, J. Laven and M.M. Viitanen 11
Axial ion–electron emission microscopy of IC radiation hardness
B.L. Doyle, G. Vizkelethy, D.S. Walsh and D. Swenson 19
Development of enhanced depth-resolution technique for shallow dopant profiles
M. Fujita, J. Tajima, T. Nakagawa, S. Abo, A. Kinomura, F. Pászti, M. Takai, R. Schork, L. Frey and H. Ryssel 26
The point defect engineering approaches for ultra-shallow boron junction formation in silicon
W.-K. Chu, J.R. Liu, X. Lu, L. Shao, X. Wang and P. Ling 34
Ion implantation of rare earth ions for light emitters
Ch. Buchal, S. Wang, F. Lu, R. Carius and S. Coffa. 40
RBS analysis of trace gas uptake on ice
T. Huthwelker, U.K. Krieger, U. Weers, Th. Peter and W.A. Lanford 47
The new Melbourne nuclear microprobe system
D.N. Jamieson, B. Rout, R. Szymanski, P. Spizzirri, A. Sakellariou, W. Belcher and C.G. Ryan 54

II. Ion-solid Interactions

II.1. Stopping Powers

Simultaneous wide-range stopping power determination for several ions
T. Alanko, W.H. Trzaska, V. Lyapin, J. Räisänen, G. Tiourine and A. Virtanen. 60
Stopping power of swift neon ions in dependence on the charge state in the non-equilibrium regime
A. Blazevic, H.G. Bohlen and W. von Oertzen 64
Electronic stopping power of swift heavy ions in carbon
Y. Zhang and G. Possnert 69
Energy loss measurements of H_2 and H_3 molecular beams along random and $\langle 110 \rangle$ directions of Si
M. Behar, C. Cohen, J.H.R. dos Santos and P.L. Grande 74
Random stopping power and energy straggling of ^{16}O ions into amorphous Si target
L.L. Araujo, P.L. Grande, M. Behar and J.H.R. dos Santos 79

0168-583X/02/$ - see front matter © 2002 Published by Elsevier Science Ltd. All rights reserved.
PII: S0168-583X(02) 01025-X

Measurements of Si ion stopping in amorphous silicon
H.J. Whitlow, H. Timmers, R.G. Elliman, T.D.M. Weijers, Y. Zhang, J. Uribastera and D.J. O'Connor .. 84
Electronic energy loss of swift protons in the oxides Al_2O_3, SiO_2 and ZrO_2
I. Abril, R. Garcia-Molina, N.R. Arista and C.F. Sanz-Navarro 89

II.2. Cross-sections

Measurement of (p,p) elastic differential cross-sections for carbon, nitrogen, oxygen, aluminium and silicon in the 500–2500 keV range at 140° and 178° laboratory scattering angles
A.R. Ramos, A. Paúl, L. Rijniers, M.F. da Silva and J.C. Soares 95
Helium elastic scattering from carbon for 30° to 150° in the energy region from 2 to 4.8 MeV
I. Bogdanović Radović, M. Jakšić, O. Benka and A.F. Gurbich..... 100
Cross-sections of $^{11}B(p,\alpha)^8Be$ reaction for boron analysis
J. Liu, X. Lu, X. Wang and W.-K. Chu..... 107
An empirical formula for *L* line X-ray production cross-section of elements from Ag to U for protons below 3.5 MeV
D. Strivay and G. Weber 112
Proton-induced γ-ray analysis of lithium in thick samples
R. Mateus, A.P. Jesus, B. Braizinha, J. Cruz, J.V. Pinto and J.P. Ribeiro..... 117

II.3. Emission Processes

Charge state distributions of heavy ions after scattering at surface atoms
C. Klein, R. Grötzschel, M. Mäder and W. Möller..... 122
Neutralization of He ions scattered from Ca surface
M. Sasaki, P.J. Scanlon, S. Ermolov and H.H. Brongersma..... 127
Spatial and energy distributions of the fragments resulting from the dissociation of swift molecular ions in solids
S. Heredia-Avalos, R. Garcia-Molina and I. Abril 131
Ion beam induced luminescence of materials
R.J. Brooks, D.E. Hole and P.D. Townsend 136
Light emission from oxygen covered Al and Cu surfaces
C.S. Lee, Z.M. Lin, Z.M. Yen and C.H. Lin 141
Real-time evolution of ion–surface interactions of $MgAl_2O_3$ and $LiNbO_3$ detected by ion-induced photon spectroscopy
V. Bandourko, N. Umeda and N. Kishimoto..... 146
High ion-beam induced electron yields from polycrystalline diamond
D.I. Hoxley, D.N. Jamieson, S. Prawer, V. Richter and R. Kalish 151
Proton beam micromachining: electron emission from SU-8 resist during ion beam irradiation
A.A. Bettiol, I. Rajta, E.J. Teo, J.A. van Kan and F. Watt..... 154
Carbon KVV Auger electron emission from highly oriented pyrolytic graphite bombarded by fast protons
H. Kudo, K. Haruyama, T. Kinoshita, S. Seki, K. Narumi and H. Naramoto 160

II.4. Target effects

Structure dependent electronic sputtering of a-C:H films by swift heavy ions
S. Ghosh, D.K. Avasthi, T. Som, A. Tripathi, D. Kabiraj, A. Ingale, S. Mishra, V. Ganesan, S. Zhang and X. Hong 164
Studies of electronic sputtering of fullerene under swift heavy ion impact
S. Ghosh, D.K. Avasthi, A. Tripathi, S.K. Srivastava, S.V.S. Nageswara Rao, T. Som, V.K. Mittal, F. Grüner and W. Assmann 169
Atomic mixing in thin film systems by swift heavy ions
W. Bolse and B. Schattat 173

III. New or Novel Techniques and Applications

The novel HVEE 5 MV Tandetron™
A. Gottdang, D.J.W. Mous and R.G. Haitsma 177
Detection system for depth profiling of radiotracers
P. Laitinen, G. Tiourine, V. Touboltsev and J. Räisänen 183
External PIGE–PIXE measurements at the São Paulo 8UD tandem accelerator
M.A. Rizzutto, M.H. Tabacniks, N. Added, R. Liguori Neto, J.C. Acquadro, M.M. Vilela, T.R.C.F. Oliveira, R.A. Markarian and M. Mori 186
The development of a time of flight spectrometer for LARN
G. Mathot and G. Terwagne 190
Real-time measurement of implanted deuterons by using the nuclear reaction $^{2}H(d,p)^{3}H$
N. Kawachi, T. Katabuchi, M. Yamaguchi and Y. Tagishi 195
In situ ERD analysis of sol–gel films during thermal processing
N. Dytlewski, P.J. Evans, J.T. Noorman, D.B. Garton and D.J. Cassidy 199
Single photon ionisation of self assembled monolayers
B.V. King, M.R. Savina, C.E. Tripa, W.F. Calaway, I.V. Veryovkin, J.F. Moore and M.J. Pellin. 203
Ion-induced photon spectroscopy of insulators and application to in-situ diagnostics of nanoparticle formation processes
N. Kishimoto, V.V. Bandourko, Y. Takeda, N. Umeda and C.G. Lee 207
Ion-beam-induced-charge characterisation of particle detectors
C. Yang, D.N. Jamieson, S.M. Hearne, C.I. Pakes, B. Rout, E. Gauja, A.J. Dzurak and R.G. Clark . . 212
Accumulation of decelerated gold ions
D. Ratschko, D. Knolle, E. Finke and M. Gläser 217
Surface properties of electrolyte solutions studied with ion beam analysis
G. Andersson, H. Morgner and K.-D. Schulze 222
Study of the permeability of thin films of a-Si:H using MeV ion beams
A.M. Brockhoff, W.M. Arnoldbik and F.H.P.M. Habraken 226

IV. Computer Simulation and Analysis

RBS without humans
N.P. Barradas, A. Vieira and R. Patrício 231
Applying elastic backscattering spectrometry when the nuclear excitation function has a fine structure
A.F. Gurbich, N.P. Barradas, C. Jeynes and E. Wendler 237
Analysis of sapphire implanted with different elements using artificial neural networks
A. Vieira, N.P. Barradas and E. Alves 241
Fitting of RBS data including roughness: Application to Co/Re multilayers
N.P. Barradas 247
Efficiency enhancements to Monte Carlo simulation of heavy ion elastic recoil detection analysis spectra
R.D. Franich, P.N. Johnston, I.F. Bubb, N. Dytlewski and D.D. Cohen 252
Dynamic Monte Carlo simulation of surface composition change during sputter depth profiling
Y. Miyagawa and S. Miyagawa. 256
Ion–solid interactions and defects in silicon carbide
W.J. Weber, W. Jiang, F. Gao and R. Devanathan. 261

V. Ion Micro- and Nanoprobes – Developments and Applications

Scanning transmission ion microscopy tomography at the Leipzig nanoprobe LIPSION
T. Reinert, A. Sakellariou, M. Schwertner, J. Vogt and T. Butz. 266
JAERI Takasaki in-air micro-PIXE system for various applications
T. Sakai, T. Kamiya, M. Oikawa, T. Sato, A. Tanaka and K. Ishii 271

The external beam microprobe facility in Florence: Set-up and performance
M. Massi, L. Giuntini, M. Chiari, N. Gelli and P.A. Mandò 276
The performance of the Ljubljana ion microprobe
J. Simičič, P. Pelicon, M. Budnar and Ž. Šmit 283
Hydrogen analysis of mineral samples at University of Tsukuba
K. Sasa, H. Ohshima, Y. Yamato, T. Komatsubara, T. Katabuchi, K. Shima, K. Furuno, M. Kurosawa and N. Yanagisawa 287
Deuteron induced gamma-ray emission method applied at a nuclear microprobe for carbon and oxygen content measurements
Z. Elekes, Gy. Szöőr, Á.Z. Kiss, P. Rózsa, A. Simon, I. Uzonyi and J. Simulák 291
Medium energy ion-nanoprobe with TOF-RBS for semiconductor process analysis
K. Iwasaki, J. Tajima, H. Takayama, F. Pászti and M. Takai 296
Elastic recoil detection analysis on the ANSTO heavy ion microprobe
R. Siegele, I. Orlic and D.D. Cohen 301
Proton beam micromachined resolution standards for nuclear microprobes
F. Watt, I. Rajta, J.A. van Kan, A.A. Bettiol and T. Osipowicz 306
Suitable test structures for submicron ion beam analysis
D. Spemann, T. Reinert, J. Vogt, D. Dobrev and T. Butz 312
MeV microprobe analysis of polymer films: radiation damage aspects
R. Delto, R. Samlenski and R. Brenn 318
Micro-ERDA studies of hydrogen in polycrystalline CVD diamond windows
R. Samlenski, Ch. Haug, R. Delto, Ch. Wild and R. Brenn 324
Investigation of the radiation hardness on semiconductor devices using the ion micro-beam
T. Nishijima, T. Ohshima and K.K. Lee 329
Ion beam induced charge characterisation of a silicon microdosimeter using a heavy ion microprobe
I. Cornelius, R. Siegele, A.B. Rosenfeld and D.D. Cohen 335
Sub-micron channeling contrast microscopy on reactive ion etched deep Si microstructures
E.J. Teo, M. Alkaisi, A.A. Bettiol, T. Osipowicz, J. Van Kan, F. Watt and A. Markwitz 339
High resolution channeling contrast microscopy and channeling analysis of SiGe quantum well structures
T. Osipowicz, H.L. Seng, L.S. Wielunski, E.S. Tok, G. Breton and J. Zhang 345
Micro-RBS characterisation of the chemical composition and particulate deposition on pulsed laser deposited $Si_{1-x}Ge_x$ thin films
A. Simon and Z. Kántor 351
Nuclear microprobe analysis of U-doped $(Bi,Pb)_2Sr_2Ca_2Cu_3O_y$/Ag superconducting tapes
B. Rout, J. Hendriks, D.N. Jamieson, R. Szymanski, D. Milliken and S.X. Dou 357
Filiform corrosion imaged beneath protection layers on Al alloys
R. Szymanski, D.N. Jamieson, A.E. Hughes, A. Mol, S. van der Zwaag and C.G. Ryan 365
Analysis of metallic pigments by ion microbeam
P. Pelicon, M. Klanjšek-Gunde, M. Kunaver, J. Simčič and M. Budnar 370

VI. Experimental Developments and Considerations

Fundamental effects and non-linear Si detector response
H.J. Whitlow and Y. Zhang 375
Assessment of pulse height defect in passivated implanted planar Si detectors used for channeling measurements with slow, highly charged heavy projectiles
J.D. Meyer, S. Biri, F. Ditrói, O. Hohn, S. Runkel and K. Stiebing 379
Response of Si p-i-n diode and Au/n-Si surface barrier detector to heavy ions
Y. Zhang and H.J. Whitlow 383
Silicon detector response to heavy ions at energies of 1–2 MeV/amu
T.D.M. Weijers, J.A. Davies, R.G. Elliman, T.R. Ophel and H. Timmers 387

Unique capabilities of heavy ion elastic recoil detection with gas ionization detectors
H. Timmers, T.D.M. Weijers and R.G. Elliman 393
Accurate depth profiling through energy-dependent pulse height deficit compensation in gas ionization detectors
T.D.M. Weijers, H. Timmers and R.G. Elliman 397
Simple concepts for ion source improvement
P.A. Hausladen, D.C. Weisser, N.R. Lobanov, L.K. Fifield and H.J. Wallace 402
Rutherford backscattering spectroscopy and elastic recoil detection analysis with lithium ions – The better alternative to helium?
M. Mayer, J. Roth and K. Ertl 405
Use of reference samples for more accurate RBS analyses
W.A. Lanford, P. Pelicon, B. Zorko and M. Budnar 410
Optimal geometry for GeSi/Si super-lattice structure RBS investigation
L.S. Wielunski, T. Osipowicz, E.J. Teo, F. Watt, E.S. Tok and J. Zhang 414
Accurate hydrogen depth profiling by reflection elastic recoil detection analysis
R.D. Verda, J.R. Tesmer, M. Nastasi and R.W. Bower 419
Release of nitrogen from SiO_xN_y films during RBS measurement
K. Kimura, K. Nakajima, H. Kobayashi, S. Miwa and K. Satori 423
Threshold stoichiometry for beam induced nitrogen depletion of SiN
H. Timmers, T.D.M. Weijers, R.G. Elliman, J. Uribasterra, H.J. Whitlow and E.-L. Sarwe 428
Ion beam induced desorption from thin films: SiO_2 single layers and SiO_2/Si multilayers
W.M. Arnoldbik, N. Tomozeiu and F.H.P.M. Habraken 433

VII. Applications of Ion-beam Analysis

VII.1. Biomedical, Environmental, Archaeological and Geological

Heavy metal pathways and archives in biological tissue
I. Orlic, R. Siegele, D.D. Menon, S.J. Markich, D.D. Cohen, R.A. Jeffree, D.C. McPhail, A. Sarbutt and E. Stelcer 439
Study by PIXE method of trace elements transferred from prostheses to soft tissues and organs
H. Oudadesse, G. Guibert, E. Chassot, J.L. Irigaray, S. Terver, G. Vanneuville, Y. Tessier, T. Sauvage and G. Blondiaux 445
Trace element analysis of blood samples from mentally challenged children by PIXE
R. Asok Kumar, V.J. Kennedy, K. Sasikala, A.L.C. Jude, M. Ashok and Ph. Moretto 449
Strontium in 19th century Australian children's teeth
A.-M.M. Williams, D.A. Donlon, C.M. Bennett and R. Siegele 453
Combined PIXE and SEM study of the behaviour of trace elements in gel formed around implant coated with bioactive glass
H. Oudadesse, J.L. Irigaray, Y. Barbotteau, V. Brun and Ph. Moretto 458
Ion beam methods to determine trace heavy metals concentrations and sources in urban airsheds
D.D. Cohen, E. Stelcer and D. Garton 466
Aerosol characterisation in Italian towns by IBA techniques
V. Ariola, L. Campajola, A. D'Alessandro, P. Del Carmine, F. Gagliardi, F. Lucarelli, P.A. Mandò, G. Marcazzan, R. Moro, S. Nava, P. Prati, G. Valli, R. Vecchi and A. Zucchiatti 471
Application of the micro-PIXE technique for analyzing arsenic in biomat and lower plants of lichen and mosses around an arsenic mine site, at Gunma, Japan
T. Ohnuki, F. Sakamoto, N. Kozai, M. Samadfam, T. Sakai, T. Kamiya, T. Satoh and M. Oikawa . . . 477
Detection limit improvement for Mg in marine foraminiferal calcite by using helium induced X-ray emission
L. Beck, F. Bassinot, M. Gehlen, Ph. Trouslard, S. Pellegrino and C. Levi 482
Non-destructive analysis and appraisal of ancient Chinese porcelain by PIXE
H.S. Cheng, Z.Q. Zhang, H.N. Xia, J.C. Jiang and F.J. Yang 488

PIXE cluster analysis of ancient ceramics from North Syria
I.E. Kieft, D.N. Jamieson, B. Rout, R. Szymanski and A.S. Jamieson 492
Trace elements measurement by PIXE in the appraisal of the ancient potteries
Z.Q. Zhang, H.S. Cheng, H.N. Xia, J.C. Jiang, M.H. Gao and F.J. Yang 497
Proton induced X-ray emission and proton induced gamma ray emission analysis in geochemical exploration for gold and base metal deposits
A. Pwa, R. Siegele, D.D. Cohen, E. Stelcer and J.C. van Moort 501

VII.2. Dielectric Thin Films and Materials

Advanced characterization of high-k materials: A nuclear approach
B. Brijs, C. Huyghebaert, S. Nauwelaerts, M. Caymax, W. Vandervorst, K. Nakajima, K. Kimura, A. Bergmaier, G. Döllinger, W.N. Lennard, G. Terwagne and A. Vantomme 505
Ion beam studies of high-k ultrathin films deposited on Si
R.P. Pezzi, C. Krug, E.B.O. da Rosa, J. Morais, L. Miotti and I.J.R. Baumvol. 510
Quantitative analysis of the oxygen content in TiO_2 films deposited by electron-beam evaporation using $^{16}O(\alpha,\alpha)^{16}O$ resonant elastic scattering
J.C. Jiang, H.S. Cheng, B. Li, Z.H. Wang, Z.Q. Zhang, F.S. Zhang and F.J. Yang. 514
Role of oxides in high velocity thermal spray coatings
W.J. Trompetter, A. Markwitz and M. Hyland 518
Incorporation of tungsten in lithium niobate by diffusion
A. Kling, C. Valdrez, J.G. Marques, M.F. da Silva and J.C. Soares. 524
RBS-channeling measurements of sapphire (0 0 1) substrate implanted with high-energy O and Cu ions
S. Nakao, Y. Miyagawa, S. Miyagawa, M. Tazawa and M. Ikeyama 528
Investigation of the environment of Cr ions implanted into sapphire
M.J. Norman, L.D. Morpeth and J.C. McCallum. 533
Narrow nuclear resonance profiling of Al with subnanometric depth resolution
E.B.O. da Rosa, C. Krug, F.C. Stedile, J. Morais and I.J.R. Baumvol 538

VII.3. Semiconductors – Conventional and Wide Band Gap Materials

Lattice location of implanted Ag in Si
U. Wahl, J.G. Correia, A. Vantomme and ISOLDE Collaboration 543
Activation and dopant sites of ultra-shallow implanted boron and arsenic in silicon
H. Kobayashi, I. Nomachi, S. Kusanagi and F. Nishiyama 547
Application of NRA to evaluation of boron implants in Si for shallow junctions
M. Suzuki, M. Tomita and A. Murakoshi 552
Determination of the erbium lattice site in bismuth tellurite using PIXE/channeling
A. Kling, M.F. da Silva, J.C. Soares, I. Földvári and Á. Péter. 556
Strain relaxation and compositional analysis of InGaN/GaN layers by Rutherford backscattering
E. Alves, S. Pereira, M.R. Correia, E. Pereira, A.D. Sequeira and N. Franco 560
Strain and compositional profile determination in ion bombarded heterostructures by the complementary use of RBS/channeling and high resolution X-ray diffraction
A. Turos, J. Gaca, M. Wojcik, A. Stonert and R. Groetzschel. 565
Planar MeV ion channeling on strained buried nanofilms
L.J.M. Selen, L.J. van IJzendoorn, P.J.M. Smulders and M.J.A. de Voigt. 570
Oxygen isotopic exchange occurring during dry thermal oxidation of 6H SiC
I.C. Vickridge, D. Tromson, I. Trimaille, J.-J. Ganem, E. Szilágyi and G. Battistig 574
Characterization of SiC thermal oxidation
C. Radtke, R.V. Brandão, R.P. Pezzi, J. Morais, I.J.R. Baumvol and F.C. Stedile. 579
Ion beam analysis of the segregation and solubility of iridium during silicon crystallization
A. Almendra, A. Rodríguez, T. Rodríguez, A. Kling, M.F. da Silva, J.C. Soares and C. Ballesteros . . . 583

Surface segregation of Ge during Si growth on Ge/Si(0 0 1) at low temperature observed by high-resolution RBS
K. Nakajima, N. Hosaka, T. Hattori and K. Kimura 587
The use of ion channeling and elastic recoil detection in determining the mechanism of cleavage in the ion-cut process
T. Höchbauer, M. Nastasi, R.D. Verda, A. Misra, K. Henttinen, I. Suni, S.S. Lau and J.W. Mayer . . . 592
In-depth concentration distribution of Ar in Si surface after low-energy Ar^+ ion sputtering
D.W. Oh, S.K. Oh, H.J. Kang, H.I. Lee and D.W. Moon 598
Collapse of nanocavities studied by ion-channeling and Raman spectroscopy
B.C. Johnson and J.C. McCallum 602
Platinum atom location on the internal walls of nanocavities investigated by ion channeling analysis
A. Kinomura, J.S. Williams, N. Tsubouchi and Y. Horino 606
Characterisation of amorphous silicon solar cells by IBA methods
Z. Medunić, D. Gracin, I. Bogdanović Radović and M. Jakšić 611
PIXE and RBS investigation of growth phases of ultra-thin chemical bath deposited CdS films
P.C. Duncan, S. Hinckley, E.A. Gluszak and N. Dytlewski 615
Ion beam analysis of ion-assisted deposited amorphous GaN
V.J. Kennedy, A. Markwitz, U.D. Lanke, A. McIvor, H.J. Trodahl and A. Bittar 620
Study of calcium implanted GaN
E. Alves, C. Liu, E.B. Lopes, M.F. da Silva, J.C. Soares, C. Boemare, M.J. Soares and T. Monteiro . . 625
Ion beam analysis of aluminium in thin layers
M.J.F. Healy, A.J. Pidduck, G. Dollinger, L. Gorgens and A. Bergmaier 630
Deuterium channeling study of disorder in Al_2^{2+}-implanted 6H-SiC
W. Jiang, W.J. Weber, S. Thevuthasan and V. Shutthanandan 636

VII.4. Metallic and Superconducting Thin Films and Materials

Clustering in Pb thin films on Si(1 1 1) and Pb-induced Si surface ordering
B. Rout, J. Kamila, M. Rundhe and B.N. Dev 641
Initial oxidation of AlPdMn quasicrystals – A study by high-resolution RBS and ERDA
D. Plachke, A. Khellaf and H.D. Carstanjen 646
Ion beam analysis of helium and its irradiation effect on hydrogen trapping in W single crystals
S. Nagata, B. Tsuchiya, T. Sugawara, N. Ohtsu and T. Shikama 652
RBS/channeling analysis of epitaxial films with Nb buffer layer on sapphire substrate
S. Yamamoto and H. Naramoto 657
Use of nuclear microanalysis to study the oxygenation mechanism of $Y_1Ba_2Cu_3O_{7-x}$ thin films: estimation of the oxygen diffusion coefficients
J. García López, M.A. Respaldiza, J. Siejka, E. Bréelle, Y. Lemaître, J.C. Mage and B. Marcilhac 661
Ion beam analysis of $Zn_{2-2x}Cu_xIn_xS_2$ films
D. Spemann, J. Vogt, T. Butz, D. Oppermann, M. Lorenz, G. Wagner and K. Bente 667
Surface quality studies of high-T_c superconductors of the Hg-, Tl- and Hg_xTl_{1-x}-families: RBS and resonant C and O backscattering studies
A. Vantomme, E. Alves, J.G. Correia, I. Bryntse, L.-G. Johansson, S.M. Loureiro, S. Lefloch, P. Toulemonde, P. Bordet and C. Bougerol-Chaillout 673
Inclusion of Mg impurities in YBCO films on MgO substrate during sputter deposition
N. Matsunami, K. Sakai and Y. Takai 679
Composition analysis of the insulating barrier in magnetic tunnel junctions by grazing angle of incidence RBS
P. Wei, N.P. Barradas, J.C. Soares, M.F. da Silva, U. Kreissig, S. Cardoso and P.P. Freitas 684

VII.5. Hydrogen Profiling

Hydrogen analysis of CVD homoepitaxial diamond films by high-resolution elastic recoil detection
K. Kimura, K. Nakajima, S. Yamanaka, M. Hasegawa and H. Okushi 689

Hydrogen depth resolution in multilayer metal structures, comparison of elastic recoil detection and resonant nuclear reaction method
L.S. Wielunski, D. Grambole, U. Kreissig, R. Grötzschel, G. Harding and E. Szilágyi. 693
Hydrogen analyses of titanium hydride by ERD and NRG methods
B. Tsuchiya, M. Teshigawara, S. Nagata, K. Konashi, R. Yasuda, Y. Nishino, T. Nakagawa and M. Yamawaki. 699

VII.6. Other Materials and Systems

Rapid chemical state analysis by a highly sensitive high-resolution PIXE system
K. Maeda, K. Hasegawa, H. Hamanaka, M. Maeda, S. Yabuki and K. Ogiwara 704
Ion beam induced luminescence of thin films
R.J. Brooks, D.E. Hole, P.D. Townsend, Z. Wu, J. Gonzalo, A. Suarez-Garcia and P. Knott 709
On the determination of nitrogen in carbon matrix by deuteron induced gamma-ray emission technique
G.Á. Sziki, Z. Elekes, I. Uzonyi and Á.Z. Kiss. 714
Ion beam analysis of light elements in nanoporous surfaces produced by single- and multiple-energy helium ion implantation
A. Markwitz, P.B. Johnson, P.W. Gilberd and G.A. Collins 718
Characterisation of titanium nitride thin films prepared using PVD and a plasma immersion ion implantation system
S.H.N. Lim, D.G. McCulloch, S. Russo, M.M.M. Bilek and D.R. McKenzie 723
In situ diffusion measurements during RBS analysis of polymers coated with aluminium
S. Mändl, B. Stritzker and B. Rauschenbach 728
Discovery of the rate limiting step in solid oxide fuel cells by LEIS
M. de Ridder, R.G. van Welzenis, H.H. Brongersma, S. Wulff, W.-F. Chu and W. Weppner 732
Ion beam analysis of aluminium ion implanted titanium diboride thin films
S. Mollica, D.K. Sood, P.J. Evans, N. Dytlewski and K.T. Short. 736
RBS study of the reactions in the Si/Co/Ta/Co system after isothermal annealings between 360 and 650 °C
C. Franklyn, J. Aspeling, W. Strydom and R. Malunga 742
Application of atomic and nuclear techniques to the study of inhomogeneities in electrodeposited α-particle sources
A. Martín Sánchez, M.J. Nuevo, M. Jurado Vargas, J. Díaz Bejarano, M.F. da Silva, C. Roldán García, A. Paúl, J.L. Ferrero Calabuig, A. Méndez Vilas and D. Juanes Barber 747

VIII. Ion Beam Modification of Materials

The effect of crystal orientation on thermal shock-induced fracture and properties of ion implanted sapphire
V.N. Gurarie, P.H. Otsuka, D.N. Jamieson, J.S. Williams and M. Conway 751
Implantation temperature dependence of He bubble formation in Si
D.L. da Silva, P.F.P. Fichtner, M. Behar, A. Peeva, R. Koegler and W. Skorupa 756
Cold ion-cutting of hydrogen implanted Si
K. Henttinen, T. Suni, A. Nurmela, I. Suni, S.S. Lau, T. Höchbauer, M. Nastasi and V.-M. Airaksinen 761
Depth profiles of cluster-ion-implanted BSi in silicon
J.H. Liang, S.L. Chiang, C.T. Chen, H. Niu and M.S. Tseng. 767
In situ measurements of the channeling dependence of ion-beam-induced recrystallization in silicon
G. de M. Azevedo, J.S. Williams, I.M. Young, M.J. Conway and A. Kinomura 772
The effect of potassium on the rate of solid phase epitaxy in silicon
A.C.Y. Liu, J.C. McCallum and P.N.K. Deenapanray 777
Effect of ion species on implantation-produced disorder in GaN at liquid nitrogen temperature
S.O. Kucheyev, J.S. Williams, J. Zou, G. Li, C. Jagadish and A.I. Titov 782

Non-linear effect on radiation damage of silicon by cluster ion bombardment
J. Liu, X. Wang, L. Shao, X. Lu and W.-K. Chu 787
Isolated cluster ion impact on solid surfaces HOPG, Si and Cu(TiO_2)/Si surfaces
J.-H. Song and W.-K. Choi 792
Optical properties of nanoparticle composites in insulators by high-flux 60 keV Cu^- implantation
Y. Takeda, C.G. Lee and N. Kishimoto 797
Annealing reactions in lead implanted copper
A. Johansen, E. Johnson, L. Sarholt, E. Dupont, H.H. Andersen and V.S. Touboltsev 802
Change of preferred orientation in TiN thin films grown by ultrahigh vacuum reactive ion beam assisted deposition
H.J. Shin, Y.J. Cho, J.Y. Won, H.J. Kang, C.H. Baeg, J.W. Hong and M.Y. Wey 807
Surface modification of a fuel cell material by ion implantation
A.G.J. Vervoort, P.J. Scanlon, M. de Ridder, H.H. Brongersma and R.G. van Welzenis 813
X-ray reflectivity of ion-beam-deposited Ag/Al multilayers
S.B. Qadri, C. Kim and M. Yousuf 817

IX. Complementary Techniques of Analysis

Intercomparison of electron probe micro-analyses and particle induced X-ray emission analyses of Pt–Pd–Ni–S matrices
R.K.W. Merkle, C.B. Franklyn, W. Przybylowicz and S.M.C. Verryn 821
Impurity measurements in semiconductor materials using trace element accelerator mass spectrometry
F.D. McDaniel, S.A. Datar, M. Nigam and G.V. Ravi Prasad 826
Simplified methodology of the ultra-thin layer activation technique
L. Vincent, T. Sauvage, O. Lacroix, M. Saillard, G. Blondiaux and L. Guinard 831
Implantation sites of Ce and Gd in diamond
K. Bharuth-Ram, U. Vetter, H. Hofsäss, C. Ronning, M. Dietrich and the ISOLDE Collaboration . . . 835
Hyperfine interaction studies with monolayer depth resolution using ultra-low energy radioactive ion beams
A. Vantomme, B. Degroote, S. Degroote, K. Vanormelingen, J. Meersschaut, B. Croonenborghs, S.M. Van Eek, H. Pattyn, M. Rots and G. Langouche 840
Impurity gettering by cavities in Si investigated with the PAC technique
J. Bartels, R. Vianden and M.C. Ridgway 846
Structural characterization of amorphised InAs with synchrotron radiation
G. de M. Azevedo, M.C. Ridgway, K.M. Yu, C.J. Glover and G.J. Foran 851
Application of synchrotron radiation technique to analysis of environmental samples
M. Zaw, R. Szymczak and J. Twining 856
Secondary ion mass spectrometry with gas cluster ion beams
N. Toyoda, J. Matsuo, T. Aoki, I. Yamada and D.B. Fenner 860
Combinatorial synthesis of ZnTe nanocrystals in SiO_2 on silicon by ion implantation
I. Großhans, H. Karl and B. Stritzker 865
Substitution and electrical activation of carbon in C- and C + P-implanted InP
K. Kushida, O. Ogawa, K. Kuriyama, N. Hayashi, M. Ogura, M. Hasegawa and N. Kobayashi 869
Electrical characteristics of proton irradiated AlGaN devices
S.M. Hearne, D.N. Jaimeson, C. Yang, S. Prawer, J. Salzman and O. Katz 873
X-ray determination of strain in ion implanted GaN
S.B. Qadri, B. Molnar, M. Yousuf and C.A. Carosella 878
Characterization of ion-beam-induced amorphous structures by advanced electron microscopy
M. Ishimaru, I.-T. Bae, T. Ohkubo, Y. Hirotsu and K.E. Sickafus. 882
